

Incorporating Extempore Into Your Curriculum

Existing activities can be ported over to the tool in minutes and a simple link will allow your students to sign up.

Feel free to copy and modify the text below for your syllabus:

How to enroll in this class with the Extempore app

We will use **Extempore** to record our practice and to record our final oral exam at the end of the semester.

Follow these three steps to create and Extempore account and to enroll in this class:

- **Click on this unique course link** (INSERT YOUR CLASS LINK HERE) and choose one of the two options: create a new account (if you have not used Extempore with another professor) or add your course to an existing account (if you used Extempore with another professor before).
- **Enter the information** (username, email, password, etc.) when prompted and make sure you remember what username, email and password you used.
- **Download the Extempore app** for free from Google Play or the Apple Store, or you can use it in a browser in your laptop (only Chrome and Firefox are supported, so make sure you have those browsers installed).

Common mistake!!! Do not go to the Extempore website to create an account. The only way to create an account and enroll in this class is through the unique course link above.
